54     </div>
55
56     <!--Project Description-->
57     <br><hr><br>
58     <h1>Project01: Audio Changer</h1>
59     <p>Next build an app with the following features:</p>
60     <ul>
61         <li>-display the file name of the audio file</li>
62         <li>-display the list of titles (buttons are nice, but use whatever DOM
object you think looks best); this is like the playlist</li>
63         <li>-when user selects a title, play just that segment</li>
64         <li>-a button to rewind 5 seconds</li>
65         <li>-a button to forward 5 seconds</li>
66         <li>-a button to pause/play - this should be a single button that toggles
between pause and play</li>
67         <li>-display the current time of the audio file</li>
68         <li>-your app should support up to 50 titles (minimum of 6)</li>
69     </ul>
70
71 </main>
