PURPOSE: knowing how to become a full-stack developer requires several skills. HTML & CSS go hand in hand. While you may be aspire to be a graphic designer, having knowledge of HTML and CSS is critical to interface with graphic designers. You will be more respected if you know somethings about their world, and knowing HTML and CSS will help you gain their respect. This group assignment is designed to help you practice some of the CSS elements, of which there are hundreds of different elements. In web development, CSS (Cascading Style Sheets) has a wide range of elements that can be used to style and format web pages. Some common CSS elements include selectors (such as classes, IDs, element names), properties (like color, font-size, margin), and values (numeric values, color names, etc.). This assignment will expose you to some of the more popular elements.

This assignment will have you go through **https://www.w3schools.com/css/** ⤴ **(https://www.w3schools.com/css/)** to learn CSS.

Go through the first 12 items (Home - Height/Width).

Once you understand each of these CSS elements, your group needs to create a sample web page which demonstrates each of these items.

Name the file GroupCSS1.html

Choose a member of your group and post the HTML page on their website.

ONE PERSON SUBMIT THE FOLLOWING:

Submit the URL to this webpage.

Submit a PDF of the html file for this webpage.

Use INTERNAL CSS - this means your CSS code should be within the HTML file.
