26          <div class="description">
27              <h1>Prog15 - Integrate with DB</h1>
28              <p> Create a db using PHP and SQL that has these fields in a table called
    Person: first name, last name, email address.
29                  Provide a form for the user to enter a new person record. The user
    should be able to insert as many persons as they want.
30                  Provide a button that retrieves and displays each person record sort↵
    ed by last name.
31              </p>
32          </div>
33
34          <!--Form to Insert New Person-->
35          <h2>Insert New Person</h2>
36          <form id="insertForm">
37              <label for="first_name">First Name:</label><br>
38              <input type="text" id="first_name" name="first_name" required><br>
39              <label for="last_name">Last Name:</label><br>
40              <input type="text" id="last_name" name="last_name" required><br>
```
